

CARDAX FT:
SECURING YOUR
BUSINESS

WHO'S WATCHING YOUR BUSINESS AROUND THE CLOCK?

cardax

ACCESS CONTROL

ACCESS CONTROL SYSTEMS THAT PROTECT YOU AND YOUR EMPLOYEES

Cardax FT is more than an alarm system. It's a fully flexible access control system that protects you and your employees from burglary, vandalism, loss of information, stock theft or damage to equipment.

With a Cardax FT security system you have full control over where, and when, staff, visitors or vehicles can move at all times.

Staff working alone after hours cause special concern, but with Cardax FT you can rest assured that any staff working at your premises after hours are safe and secure. No need to worry about anyone wandering in off the street.

Control access to your premises, keeping company and staff belongings safe. Prevent handbags or laptops being stolen from offices, and strangers lurking in corridors.

Forget the panic of master keys being lost or stolen. Cardax FT uses programmed cards that can be cancelled in a keystroke – ensuring the ongoing security of your premises. You'll never need to change the locks again.

Cards can be modified instantly to allow or cancel authorised access to any secure area. Adding new staff is just as simple.

Cardax FT can also produce reports and audit trails of all movements. It's that simple.

Cardax FT – Securing Your Business.

Cardax Prox Plus – for added security requiring card and a PIN number

Cardax Prox – for security requiring access card only

ACCESS CONTROL MONITORING

Card issued with access privileges

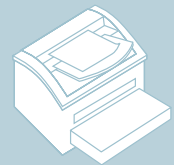

Card presented at door

Access granted or denied

Activity recorded as event in Cardax FT

Report of system activity available, showing Who has been Where and When.

ALARMS

BIG BUSINESS BENEFITS FOR ALL BUSINESS OWNERS

Every business is big enough to suffer loss from burglary and theft. That kind of loss can be severe enough to close a business down.

When you go home at night, you'll want to know your valuable business assets are safe – your stock, your premises, your staff, and your information.

A Cardax FT security system gives big business benefits to all business owners. It will let you know immediately if there's an intruder on your premises, and contact a monitoring centre to dispatch security guards to re-secure your business any time of the day or night.

There may also be other incidents that can be detected by the system, and treated as an alarm, for example when the temperature reaches a certain level for a particular area. Talk to us about the types of events you want to know about.

With its integrated access control system, Cardax FT can also monitor authorised staff movements through your premises, so you know immediately if any security is breached.

Cardax FT is a cost effective solution to replace existing systems.

Cardax FT gives you peace of mind day and night.

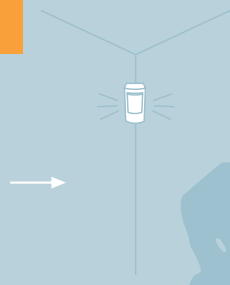

ALARM MONITORING

Building is armed using the Cardax FT Remote Arming Terminal

Intruder Attack!

PIR detects the intruder in the building

Cardax FT sends a message to the monitoring station

Monitoring station initiates appropriate response.

We've been supplying security systems to businesses around the world for more than twenty years. We'll make sure you get the system that's best for your business – now and for the future.
